N-SBG1-OH

Grade: Standard

Strong base type 1 anion resin, styrene/DVB gel, navy grade, hydroxide form

ResinTech SBG1-OH is a high solids type 1 gel strong base anion resin in hydroxide form. It has high crosslinkage and higher ion exchange capacity than other strong base anion resins resulting in especially high selectivity for various anions. SBG1-OH is intended for use in industrial applications where a hydroxide form anion resin is required, for mixed beds, high operating temperatures, and low TDS polishing such as RO permeate.

FEATURES & BENEFITS

- High total capacity for long run lengths
