DEQSTER KT10 Charging Trolly

10-KT10

Overview

The KT Series Charging Trolleys (2nd Gen.) represent compact, mobile, and efficient charging solutions for everyday school life. Designed for up to 10 iPads or tablets, the KT10C is ideal for small classes and flexible learning environments. It combines a lightweight design with smart charging and ventilation technology: temperature-controlled fans ensure quiet operation, while USB-C ports with LED indicators clearly display the charging status. Complete with integrated storage space, lockable casters, and an energy-saving timer control, the KT10C keeps devices secure, cool, and ready for class at any time, anywhere.
For classrooms with higher demands, the KT16S and KT20C models expand the concept to 16 and 20 tablets respectively, turning device management into mobile efficiency. They charge devices securely and in a space-saving manner, with the KT16S additionally allowing for synchronization for classroom and IT management. Featuring intelligent ventilation, an energy-saving timer, and a lockable housing on casters, both trolleys combine security, flexibility, and quiet operation—making them true mobile classrooms.

Highlights

- Holds and charges up to 10 devices
- USB-C charging with LED indicators
- smart, quiet ventilation
- energy-saving timer
- lightweight and mobile
- integrated storage for cables and devices
- lockable and portable design

Compatibility

Device Type	Apple iPads
Compatible devices	10 Devies
Attention	***Further compatibilities, beyond those already listed, on request!***

Key Specs

Color	Black
Materials	Polyurethan (PU)
Dimension in mm	550 x 440 x 240
Item weight net	8.75
Item weight gross	9.35
Functions	Storage, Charge, Transport/Mobility
Certifications	CE, RoHS
Number of Storable Devices	10
Power Specs	90-264 V; 50/60 Hz; max. 2.4 A pro Port
Ventilation	smart ventilation system
Mobility Features	3 sturdy external handles, telescopic handle, 2 castors
