DENBOX

DENCON

Denbox is a modular storage series that brings simplicity and flexibility to the modern workspace. It can be stacked and combined in various ways to create functional, customized storage solutions.

The modules are available in different sizes and come in a selection of lacquer colours, DPL, and veneer finishes – allowing seamless integration into any office environment. Denbox also includes a version with a flip-top lid, offering concealed storage beneath the surface, and an optional planter box that can be placed on top to add a natural, green element to the space.

All units are delivered fully assembled and equipped with felt gliders to protect floors. Made in Denmark with a focus on quality and usability, Denbox is a practical and visually clean solution for modern offices.
