Visual identity that works everywhere

Novus doesn't just adapt in function—it adapts in style. With 7 shell colours and 15 frame colours, the chair can complement any professional setting, from a clean, corporate conference room to a vibrant canteen or collaborative meeting space. This flexibility makes it easy to create a consistent look across large installations or add subtle accents that bring energy to social zones.

The design remains sleek and minimal, ensuring a professional impression in formal setups while feeling approachable in more relaxed environments. For versions with armrests, the black wing adds a refined detail that ties the collection together.

From formal presentations to informal gatherings, Novus fits every scenario with style and comfort. With Novus, your spaces work harder – and feel better – because change is no longer a challenge, it's a feature.

Frame

Shell

Flexibility for every occasion

With Novus, versatility isn't just a promise – it's built into every detail. A space designed for focused business meetings can quickly become the perfect setting for a lively celebration. This isn't about imagining possibilities; it's about making them happen.

Novus makes transitions smooth and stress-free. Weighing only 5.2 kg and featuring a practical grip hole in the shell, the chair is easy to lift, move, and rearrange without effort. Switching from a conference layout to a dinner setup takes minutes, not hours.

The patented linking bracket ensures perfect alignment and stability for conference layouts and meets fire authority requirements for chair arrangements in big assemblies. It's a solution that combines visual harmony with certified security—so your space looks great and complies with the highest standards.

Novus Chair

Smart storage & quick transitions

Novus is built for spaces that need to change fast. In a canteen, chairs can be stacked up to 16 on the floor or 30 on a trolley, making it simple to clear the room when needed. For even greater flexibility, Novus fits perfectly in a chair hanger, allowing chairs to be lifted off the floor for easy cleaning and maintenance.

The optional trolley works seamlessly with Novus Flex foldable tables, which also have their own trolley. Together, they make it possible to clear an entire room in minutes—transforming a dining area into a yoga studio or an open space for events without effort. With Novus, storage is efficient, movement is effortless, and your space is ready for whatever comes next.

Shaping workspaces with Danish expertise

Founded in 1964, Dencon stands as a beacon of Danish design and craftsmanship. With more than six decades of industry experience, we are committed to transforming workspaces through our extensive and versatile product range. Each piece, meticulously created in our own production facility in Skive, reflects our dedication to quality and innovation.

Our products are designed to offer unparalleled flexibility, allowing you to customize and adapt your workspace to meet evolving needs. From timeless elegance to cutting-edge designs, our furniture not only meets functional demands but also enhances collaboration and creativity.

We take pride in our rapid delivery times and back our products with a comprehensive 10-year warranty, underscoring our confidence in their durability and performance. At Dencon, we blend our rich heritage with a forward-thinking approach, ensuring every solution is both modern and future-ready, designed to evolve with the ever-changing landscape of work.

Choose Dencon for a workspace that embodies excellence, flexibility, and a commitment to both present and future needs.
