Product Main Number 1010002053

Suture tape, ABENA, 75x6mm, white, reinforced, sheet of 3 strips, single use

- ✓ Reinforced with nylon for additional support of the wound edges
- ✓ Breathable material

MD CE

Product Description

Reinforced skin closure strip for use in wound edge closure as an alternative to suturing or medical glue application. Can also be used to stabilize wounds in connection with, for example, sutures, and when the sutures are removed, healing is promoted as the suture tape holds the wound edges together.

LATEX STERILE

Specifications

Base name	Suture tape
Brand	ABENA
Color	White
Features	Reinforced, sheet of 3 strips
Single or multiple use	Single use
Length/depth	75 mm
Width	6 mm
Sterilization method	EO
Certificates	CE. MD.
CE Class (Medical Devices)	Class IIa
Directives, regulations and acts	93/42/EEC

Instructions for use/application

Application: Dry the skin around the wound and start by gently applying suture tape to the middle of the wound and gently press the ends into place with your fingers. Then continue with the rest of the suture tape, pressing gently down from the middle and out towards each side. Removal: Loosen one end of the tape. While pressing the middle with the other hand, remove the suture tape carefully and slowly. It is recommended that the suture tape is removed in the direction of the hair growth to avoid pain and discomfort for the patient. Do not use suture tape for more than seven days. In the event of infection around the suture tape, the suture tape must be removed immediately and the wound area treated according to current clinical guidelines.
